(a) Estimated number of wage or salary earners in employment (including part-time relief workers in actual employment or number equivalent thereto but excluding members of defence forces who are not on civil pay-rolls). (b) Subject to revision. (c) Excluding working proprietors. (d) All building operations excluding Government buildings. See footnote on p. 23. (e) Final totals to June, 1940. Monthly totals since July, 1940, are partly estimated and subject to slight revision. See p. 30. (f) Average for year. (g) Preliminary estimates. (h) Not yet available.

NEW SOUTH WALES : EMPLOYMENT.

The following table, compiled by the Government Statistician of New South Wales, shows the approximate number of persons employed in the middle week of the months specified. It replaces that published in the Review prior to June, 1941.

Period.	Total Employed in—						Number Employed by Employers with 10 or more Employees in—	
	All Employment. (a)	Private Employment.	Factories.	Retail Shops (including Restaurants).	Wholesale Trade.	Mining.	Transport (excluding Railways and Tramways).	Offices and Commerce.

(a) Excluding Rationed Relief Workers. (b) For September, 1939, and subsequent months the figures exclude men in the Forces who were not on pay-sheets of private employers. (c) Including mine employees idle owing to an industrial dispute. (d) For July, 1940, and subsequent months the figures are approximate and subject to revision.

QUEENSLAND : EMPLOYMENT.

The following table, compiled by the Queensland Bureau of Industry from census results, unemployed insurance contributions, workers' compensation records, and shop and factory returns, replaces that published in the Review prior to November, 1939.

Period.	Numbers in Work.			
	Employers and Workers on Own Account.	Employees.	Working for No Wages.	Total.
<i>Average—</i>				
1928-29	86,300	204,400	9,100	299,800
1933-34	94,700	194,700	9,600	299,000
1934-35	96,800	214,500	9,700	321,000
1935-36	98,900	223,500	9,900	332,300
1936-37	100,900	234,500	10,100	345,500
1937-38	103,000	245,800	10,300	359,100

June	107,400	266,500	11,000	384,900
1941-42—				
July	107,500	262,900	11,000	381,400
August	107,500	261,700	11,000	380,200
September	107,500	263,600	11,000	382,100

NOTE.—The figures take account of enlistments, revised figures for each month since September, 1939, having been published in the December, 1940, issue. Enlisted men have been excluded from the estimates of employment, and adjustments have been made to allow for the effect on employment of home-defence training. The figures shown for the three-monthly periods have been corrected for seasonal variation.

The figures shown above are not comparable with those shown for other States as they exclude some persons who were recorded as breadwinners at the 1933 Census.

TASMANIA : EMPLOYMENT.

The following table, compiled from the wages tax returns of private employers in respect of their employees, whether subject to or not subject to tax, and from returns of Commonwealth, State and Local Government employment, gives the best measure available of the course of *total employment* in Tasmania.

From July, 1940, total employment in Private Industry is estimated from monthly figures collected by the Deputy Statistician and not from wages tax returns.

Period.	Private Industry.			Public Authorities.			Total Employment— Public and Private.

(a) Subject to revision.

(b) Estimates for August and September, 1941, not yet available.

NOTES.

1. For 1938-39 and previous years the figures in the table may be regarded as a virtually complete record of total employment based on final collected figures. They are a combination of monthly figures received currently and annually, covering both private and public employment. They are deficient only to the inappreciable extent that some relief and other intermittent workers and domestic workers in private homes are not covered by the monthly returns. On the other hand, to the extent that they embrace the majority of workers subject to intermittent employment over the whole year, they reflect fully the seasonal and all other influences upon employment in Tasmania.

2. As from July, 1939, the number of employees of public authorities is completely recorded but the number of employees in private industry is estimated on the basis of returns covering about 44 per cent. of private employment. Extensive returns of other private employment have been collected for each month of 1939-40 and figures from July, 1939, are subject to revision on the basis of these.

A comparison of employment in retail stores in September, 1941 (the latest month for which figures are available for all States), with September, 1940, shows the following estimated percentage changes :—New South Wales, + 4.6; Victoria, + 2.8; Queensland, + 3.5; South Australia, + 5.4; Western Australia, - 0.9; Tasmania, + 0.7; Australia, + 3.3.

TRADE UNION UNEMPLOYMENT RETURNS.

The only regular records of unemployment available in comparable form over a considerable period are the quarterly percentages reported by trade unions to the Commonwealth Statistician. The membership of the reporting unions consists predominantly of males, and represents at present about 54 per cent. of the total trade union membership and between 20 and 25 per cent. of all wage and salary earners. For some States the returns are a more representative sample than for others. This table, therefore, should not be read as indicating the relative degree of unemployment amongst unionists in the individual States but as an indication of trend of unemployment as reported by secretaries of trade unions.

(a) Coal-mining employees out of work owing to an industrial dispute were excluded from the tabulation, but persons in other industries indirectly unemployed owing to the dispute were included.

INDUSTRIAL GROUPS: CHANGE FROM MAY, 1941, TO AUGUST, 1941.

Manufacturing—I. Wood, furniture, &c., 2.1% to 1.8%; II. Engineering, metal works, &c., 1.7% to 1.6%; III. Food, drink, tobacco, &c., 7.8% to 7.4%; IV. Clothing, hats, boots, &c., 1.7% to 1.4%; V. Books, printing, &c., 1.4% to 1.0%; VI. Other Manufacturing, 3.3% to 3.4%; VII. Building, 5.2% to 5.1%; VIII. Mining, quarrying, &c., 8.0% to 7.3%; X. Land Transport, other than railway and tramway services, 4.3% to 3.7%; IX., XI., XII., XIII. and XIV. Other and Miscellaneous, 3.7% to 3.1%; All Groups, 3.6% to 3.2%.

BALANCE OF OVERSEA TRADE.

In the following table the oversea trade of Australia in physical commodities has been set out in a form which distinguishes between the ordinary trade in commodities other than gold, those movements of gold which may be regarded as resulting from current Australian production, and those movements of gold which cannot be attributed to the fact that Australia is a gold-producing country. The balance of trade on "current" account (that is, including credits from gold produced rather than gold exported) is given in columns D and E. The total balance of trade, as officially recorded, is given by the total of columns D and F.

Out of the credits mentioned above, together with those accruing from other "invisible" sources and existing balances of "oversea funds", Australia has to provide for various recurrent charges incurred overseas, and some payments of a capital nature. Chief among the former are the oversea interest commitments of the Australian Governments and other public bodies, which for the present trade year are estimated at approximately £22,000,000 sterling.

£'000 Sterling.

(a) Not available for publication.

(b) Subject to revision.

NOTE.—The export figures relate only to merchandise actually shipped. Under contracts with the British Government, Australia receives payment for some exportable commodities, e.g., wool, irrespective of when the goods are shipped. Current payments for exportable goods will be somewhat larger than the recorded value of exports and payments relating to the balance of trade may be more favorable than is indicated by the figures above.

EXPORT PRICE INDEX.

These index-numbers are compiled from the prices of 20 commodities which constitute about 85 per cent. of all exports. The prices are multiplied by the average quantities exported during a fairly recent and representative period.

(Base : 1928-29 = 1,000.)

EXPORT PRICE INDEX (CHANGING BASE).

The index-numbers in the table above, while they indicate satisfactorily the general trend of the market, take no account of the relative quantities actually sold at the different prices ruling during each month. In consequence the index-numbers do not give an adequate indication of the significance of the price movements as they actually affected current sales. This is shown more accurately by the index-numbers (inclusive of gold) in the following table, in the computation of which the "quantity-multipliers" are changed each month. The index-numbers are designed solely for comparisons of current prices with those of the corresponding months, or periods of months, of the preceding year.

(Base : Weighted Average Price Level in corresponding months of preceding year = 1,000.)

Month.	1939-40.		1940-41.		1941-42.	
	<i>Month stated compared with same month of preceding year.</i>	<i>Period of trade year ending in month stated compared with same period of preceding year.</i>	<i>Month stated compared with same month of preceding year.</i>	<i>Period of trade year ending in month stated compared with same period of preceding year.</i>	<i>Month stated compared with same month of preceding year.</i>	<i>Period of trade year ending in month stated compared with same period of preceding year.</i>

PRIMARY PRODUCTION PRICE INDEXES.

The annual index-numbers in the following table have been recomputed to the base 1928-29 = 1,000 from the revised series published in *Production Bulletin* No. 34. They are based in general on prices realized in the principal markets of Australia.

The monthly index-numbers (based on the nearest equivalent wholesale quotations) are intended progressively to forecast the point which the annual index-numbers will eventually reach, and to provide a preliminary figure for the latest full year pending the completion of the annual census of production. The preliminary index-numbers will be revised as each production census is completed.

WHOLESALE PRICE INDEX.

BASIC MATERIALS AND FOODSTUFFS.

The construction of this new index has been made possible by the collection of new data on prices and consumption. Both in contents and method of computation it differs from the Melbourne Index of General Wholesale Prices. The price quotations have in the main been obtained directly from manufacturers and dealers, and, with a few important exceptions, from Melbourne sources. Apart from home-produced building materials, coal and one or two minor commodities, however, the price movements may be taken as representative of fluctuations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on average annual consumption during the years 1928-29 to 1934-35 inclusive.

(Base : 1928-29 = 1,000.)

SECURITY PRICE INDEXES.

In comparing movements in the three sets of index-numbers given below, attention should be paid to differences in the methods by which they have been constructed, and in the nature of the companies and the types of shares included in each index. These are outlined in the footnotes to the tables.

(Base : 1928-29 = 1,000.)

Period.			New South Wales : Ordinary Shares.(a)						
			23 Manufactur- ing and Distributing Companies.	10 Retail Companies.	8 Public Utility Companies.	5 Pastoral and Finance Companies.	5 Insurance Companies.	75 Companies (including 24 Miscel- laneous).	34 Active shares included in foregoing.

September	1,334	988	1,121	737	1,085	1,031	1,147

(a) Compiled by the New South Wales Government Statistician. The index-numbers are based on the prices of the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales. They represent unweighted averages of the mean monthly prices per £ of paid-up capital. Adjustments are made where capital is written off or bonus shares issued. Recomputed from original base, par values.

(a) See note (a) on page 20. These 34 shares relate to leading companies and do not include bank shares nor mining shares. (b) Compiled by the Stock Exchange of Melbourne. The index-numbers of bank shares and silverlead shares represent averages (weighted by paid-up capital, with adjustment in the case of bank shares) of the mean monthly prices on the Melbourne Stock Exchange. The preference share index-numbers are based on the reciprocals of average yields. Recomputed from original base, May, 1926. (c) Compiled by the Queensland Bureau of Industry. The index-numbers are based on the prices of the ordinary shares of 21 representative Queensland companies, and the preference shares of three companies whose ordinary shares are inactive. The index-numbers represent unweighted averages. End-of-month values were used until December, 1930, and mean monthly values thereafter. Recomputed from original base, April, 1928.

SUMMARY OF PRICE INDEXES.

(Base : 1928-29 = 1,000.)

(a) Partly estimated in respect of the City of Sydney.

NOTE.—Under the National Security (Building Control) Regulations (published 18th November, 1940) a person could not, after 4th December, 1940, apply for a permit in respect of a new building or alteration costing more than £5,000 without the prior consent of the Commonwealth Treasurer. On 19th February, 1941, this limit was reduced to £1,000 for hotels, and to £3,000 for all other buildings as from 22nd April, 1941. The "value of permits" shown above relates to the value of building permits issued by local government authorities and not to approvals granted under National Security Regulations. From 12th June, 1941, Treasurer's consent is necessary for erection of all buildings (except dwelling houses costing £3,000 and under) and for all alterations costing more than £250 for dwelling houses, £500 for hotels and shops, and £1,000 for all other buildings.

NOTES.

A. This column is the total of all series available continuously since 1928-29 for which information is at present collected at least quarterly. Columns G above and J on the next page are omitted as the information is not available for the earlier years, and column L on the next page is omitted because quarterly figures are not available.

F. Includes the Cities of Geelong West, Mildura and Warrnambool and the Towns of Horsham, Newtown and Chilwell, and Sale.

G. Includes the Cities of Ballarat, Bendigo and Geelong, and Shepparton Borough.

NOTE.—See footnote on p. 23.

(a) Figures not comparable with other months owing to the inclusion in some States of certain annual and other commitments in the expenditure figures for June.

Note.—Minus sign (—) indicates loss.

MAINLAND RAILWAYS: FREIGHT TONNAGES CARRIED.

The following table shows statistics of freight tonnages carried by the Mainland State and Commonwealth Railways.

The daily averages for freight tonnages are obtained by dividing monthly tonnages by the number of days in the month, excluding Sundays, Christmas Day and Good Friday.

Freight totals are obtained by adding together the total freight tonnages carried on the Commonwealth and State Railways and deducting the sum of the interstate tonnages carried in New South Wales and South Australia. This avoids double-counting except to a negligible extent.

Period.	Net Tonnage Carried—Mainland State and Commonwealth Railways.

WHOLESALE TRADE.

An indication of fluctuations in the value of wholesale trade is given by the returns made under the Sales Tax Acts. The returns do not relate to all wholesale trade, nor do they necessarily cover a constant proportion of all trade. The effects of legislation and administrative changes on the recorded values of taxable and exempt goods respectively are somewhat uncertain, but total recorded sales are affected in smaller degree by such changes. Insufficient information is available to enable adjustments to be made to the crude figures on this account, but endeavour is being made to obtain data that will enable approximate adjustments to be made. Monthly totals for 1939 and 1940 have now been compiled on a basis comparable with the monthly averages for preceding years.

An index of activity in New South Wales is afforded by monthly returns of the sales of 42 large factories.

(a) The Act came into operation on 18th August, 1930, the rate of tax being 2½ per cent. It was raised to 6 per cent. on 11th July, 1931, but was reduced to 5 per cent. on 26th October, 1933, and to 4 per cent. on 11th September, 1936. It was again raised to 5 per cent. on 22nd September, 1938, to 6 per cent. on 9th September, 1939, and to 8½ per cent. on 3rd May, 1940. With certain specified exemptions, all goods sold in Australia, including imports, are taxable. The list of exemptions was extended as from 11th July, 1931; 2nd September, 1932; 11th November, 1932; 27th October, 1933; 1st August, 1934; 13th December, 1934; 25th October, 1935; and 26th September, 1936. The list of taxable goods was extended as from 3rd June, 1940, and 22nd November, 1940.

(b) Subject to revision.

RETAIL TRADE.

Statistics of retail sales are collected in three States but are available for publication in only two, namely, New South Wales and Queensland. In New South Wales the Retail Traders Association Research Bureau, in co-operation with the Commonwealth Bank, collects returns from a number of large Sydney stores. In Queensland returns are collected by the Bureau of Industry from twelve large department stores in Brisbane and their branches in country towns. Because of the relatively rapid development of chain store business, it is uncertain to what extent the department store figures are representative of all retail trade.

(a) Including Inscribed Deposit Stock of E.S. and A. and Queensland National Banks. (b) Including Short-term Loans, other than Treasury Bills of the Commonwealth Bank. (c) In computing the ratios the figures relating to the Rural Bank of New South Wales have been excluded.

BANK CLEARINGS.

In the absence of statistics of debits to customers' accounts, bank clearings form a useful index of the money-value of cheque payments. Since they do not include cheques deposited in the banks on which they are drawn, the figures are not exhaustive, and their comparability is sometimes impaired by the effects of banking amalgamations. Cheque clearings connected with the redemption or issue of Treasury Bills have been excluded from the following table, but adjustments have not been made for other sporadic transactions concerned with public finance.
